

4th November 2021

Dear Professor Abe

We are delighted to accept your manuscript entitled " β -NAD as a Building Block in Natural Product Biosynthesis" for publication in Nature. Thank you for choosing to publish your work with us.

We will edit your manuscript to ensure that it is intelligible to our wide readership and that it conforms with house style (see <https://www.nature.com/nature/for-authors/editorial-criteria-and-processes> for an explanation of this process). We look particularly carefully at the titles of all papers to ensure that they are relatively brief and that indexing is accurate. Our subeditors are likely to send you the edited text for your approval before it is typeset. You will subsequently receive a PDF proof of the layout, including the figures. When you receive your proof, we suggest you send it to your co-authors for them to check, but please coordinate these changes among the co-authors so that only one author collates the set of corrections and communicates with us.

The corresponding (or other single designated) author is responsible on behalf of all co-authors for the accuracy of all content, including spelling of names and current affiliations of all co-authors; please ensure these are checked carefully.

If one of your co-authors or art staff at your institution would be the most appropriate person to deal with artwork format matters, please email art@nature.com now with the relevant details (including manuscript number and corresponding author's name).

Acceptance of your manuscript is conditional on all authors' agreement with our publication policies (see <https://www.nature.com/authors/policies/index.html>). In particular, your manuscript must not be published elsewhere, and you must abide by Nature's embargo policies. We will inform you by email as soon as your manuscript is scheduled for publication, which will not be before we have received your proof corrections. Advice about media relations is available from Nature's press office (press@nature.com).

Please note that *Nature* is a Transformative Journal (TJ). Authors may publish their research with us through the traditional subscription access route or make their paper immediately open access through payment of an article-processing charge (APC). Authors will not be required to make a final decision about access to their article until it has been accepted. [Find out more about Transformative Journals.](#)

Authors may need to take specific actions to achieve [compliance with funder and institutional open access mandates](#). For submissions from January 2021, if your research is supported by a funder that requires immediate open access (e.g. according to [Plan S principles](#)) then you should select the gold OA route, and we will direct you to the compliant route where possible. For authors selecting the subscription publication route our standard licensing terms will need to be accepted, including our [self-archiving policies](#). Those standard licensing terms will supersede any other terms that the author or any third party may assert apply to any version of the manuscript.

If you have not already done so, you may send potential cover suggestion file(s) to the production department (production_help@nature.com). Each individual email cannot exceed 5 MB. Images should be sent in low resolution, 300 dpi at 210 x 297 mm, in either .tif or .jpg format. If a suggestion is chosen, the production department will request a high resolution image. Each suggestion should be accompanied by a caption of no more than 40 words. We cannot promise that your cover suggestion will be used, as competition is intense.

We [encourage authors to share their step-by-step experimental protocols](#) on a protocol sharing platform of their choice. Nature Research's Protocol Exchange is a free-to-use and open resource for protocols; protocols deposited in this platform are citable and can be linked to from the published article. More details can be found at www.nature.com/protocolexchange/about

published article. More details can be found at www.nature.com/professionals/faq/about.

To help you disseminate your research to the broader community, our SharedIt initiative provides you with a unique shareable link that will allow anyone (with or without a subscription) to read the published article. Recipients of the link with a subscription will also be able to download and print the PDF. As soon as your article is published, you will automatically receive an email with your shareable link.

If you would like reprints of your paper (<https://www.nature.com/reprints>), you may order them through our self-service order portal (<https://eoc.sheridan.com/reprints/eorder/index.php?DBS=A&UNDO=1&PUID=10143&SERVICE=2>).

With kind regards

Bryden

Our flexible approach during the COVID-19 pandemic

If you need more time at any stage of the peer-review process, please do let us know. While our systems will continue to remind you of the original timelines, we aim to be as flexible as possible during the current pandemic. We are committed to processing manuscripts related to COVID-19 with our highest priority, and endeavour to expedite the peer-review process for COVID-19 submissions as much as is possible. Thank you for your understanding.
